Note

DCIM/100MEDIA/DJI_0029_R.JPG

Thermal image of flipping of wet compost pile. The image was acquired using a DJI Matrice 210 with a FLIR XT2 camera. The purpose of the mission was to locate any potential hot spots that could pose a fire threat. The temperatures recorded are apparent temperatures only and not precise temperatures.

The image illustrated both surface and subsurface temperatures of the wet compost pile while being flipped.

This image is for viewing purposes only and should only be used as a visual aid. More testing procedures should be performed for further analysis.
