

JOHN WAYNE AIRPORT E195 PARKING BLOCK LAYOUT

Request Number: 1 **JOB File Name:** JWA E195 PARK_GK

Date Received: Survey Crew: Kuhl & party

Date Completed: 02/21/23 **Datum:** NAD83 ZONE 6 1991.35

ATTENTION CONTRACTOR: The following rules must be observed when using survey stakes provided by the Orange County Surveyor: Cuts / Fills are given from the TOP of hub or nail. Stakes are NOT to be used without cut sheets. When a conflict exists between data on cut sheets and markings on survey stakes, the cut sheets are to be deemed paramount. No single stake is to be used without consideration of adjacent stakes; that is, three consecutive stakes that are known to be on the same line and rate of slope must be used in common, in order that any variation from this straight line or grade may be identified. In the event such discrepancy in the stakes is found, or if it is apparent that stakes do not reflect the intent of the most current approved contract plans, the Survey Party Chief must be notified ASAP. Otherwise the Orange County Surveyor will NOT be responsible for any error in the finished work. Stakes not used within 72 hours of being set will be considered to be of suspect integrity and to be used at Contractor's own risk. Inspection and/or resetting of aged stakes by the Orange County Surveyor will incur restaking charges as dictated by Section 2-9.2 of the "Standard Specifications for Public Works Construction".
