Note

DCIM/100MEDIA/DJI_0019_R.JPG

Thermal image of new wet compost pile. The image was acquired using a DJI Matrice 210 with a FLIR XT2 camera. The purpose of the mission was to locate any potential hot spots that could pose a fire threat. The temperatures recorded are apparent temperatures only and not precise temperatures.

The image is the start of a new compost pile and illustrates both the minimum, maximum and average temperature of the compost pile.

This image is for viewing purposes only and should only be used as a visual aid. More testing procedures should be performed for further analysis.
